

Deployment Fix Test: Word and PDF Consistency

Test Author

Abstract—This test document verifies that the deployment fixes work correctly. It includes table images with proper names, perfect text justification in PDF matching Word documents, and consistent visual formatting between both output formats.

Index Terms—deployment fixes, table images, PDF justification, Word consistency

1. TEXT JUSTIFICATION TEST

2. TABLE IMAGE DISPLAY TEST

REFERENCES

This paragraph tests the aggressive justification fixes applied to ensure PDF output matches Word document formatting. The text should be perfectly justified with identical line breaks and character spacing in both formats. Every line should end at exactly the same horizontal position, creating a clean, professional appearance that matches LaTeX-quality academic publications.

The following table image tests the fixes for proper name display in Word documents:

The table above should show the table name 'TABLE 2.1: DEPLOYMENT FIX VERIFICATION' before the image, and the caption after it. This ensures proper display in Word documents.
